INNOVATION PROVIDERS

FOAMS

Rigid Polyurethane (PU) and Polyisocyanurate (PIR) foams

CORAFOAM® LOW DENSITY:

Blocks, slabs and CNC machined items for **thermal and cryogenic insulation**, sandwich panels and composites.

CORAFOAM® HIGH DENSITY

Materials for **tooling and modelling**, or whenever **high mechanical performances** are requested to a foam, e.g. insulating supports for cryogenic pipelines.

CORAFOAM® SPECIAL FOAMS

Developed for **specific applications**, a combination of high technology and engineering skills.

CHEMICALS

Polyurethane systems (isocyanate & polyol) and Epoxy resins

DUNAPOL™ C - DUNAPOL™ S

A large range of formulated components (many of them water based) to obtain polyurethane foam for **insulation or filling**. Widely used for HVACR, spray insulation and asbestos encapsulation for buildings, buoys and naval construction, wood imitation, insulated doors and many others.

DUNAPOL™ AD

Polyurethane structural glues for industrial use. A wide choice among one- or two-components adhesives, with diversified reaction speed, viscosities, blends, in order to fit every industrial production process.

DUNAPOX™

Epoxy resins for marble & granite slabs strengthening, for inerts incorporation (decorative tiles or benches) and for bonding. High transparency and resistance to light, different reaction speed, viscosities, colours.

DUNAPACK™

Solutions for **packaging** and protection. Machines and chemicals for foam-in-place, creating polyurethane pillows shaped around any object. The quickest, room-saving and always-tailored way to pack.

PRE-INSULATION

SPINPIPE e SPRAYPIPE are new, original solutions for pre-insulating pipes before their arrival on site, creating an insulating shell around the pipe prior to installation. They comply with the strictest cryogenic specifications for LNG production and transport.

EQUIPMENTS & INSTRUMENTS

**Supporting the application/production of
 FOAMS and CHEMICALS**

DUNAPACK™

For foam-in-place packaging solutions. Our machines create polyurethane cushions manually (with a dispensing gun) or automatically (with a bag-dispensing machine). Machines for pre-formed moulds are also available.

CONSOLIDO™

A patented, revolutionary method for natural stone blocks consolidation: CONSOLIDO™ creates a hard, securing and containing shell around the block before sawing operations.

PEGASUS™

The most innovative, customer-oriented solution proposed by DUNA-Corradini to produce CORAFOAM® in the most faraway places in the world.
